

## OUTPATIENT PHARMACEUTICAL COVER

**The Insurer guarantees**, under the conditions, limits and requirements set out below, **cover for outpatient pharmaceutical supplies** required by policyholders.

This cover includes 50% reimbursement, **with a limit of €200 per person per year**, of those pharmaceutical products dispensed in chemist's, prescribed by a doctor and which, on the date of dispensing, are among those financed by the National Health System and which are necessary for the treatments or conditions covered under the policy.

**The Insurer will assume this cover through the cost reimbursement system**, for which **the insured person must fill in the claim form** that the Insurer has created for this purpose and submit it together with:

- **The original of the prescription which must include:**
  - The identity of the issuing physician, their signature and collegiate number.
  - The patient's identity.
  - Identification of the prescription product.
- **Original removable label of the dispensed product.**
- **Document accrediting the payment.**

In order to process the reimbursement, the insurer may exercise its right to request the clinical information from the insured person that justifies the need for the medication and the existence of the conditions referred to above.
