Cruciate ligament rupture (simple)	€340.00	<b>CANINE VACCINATIONS</b>	
Cruciate ligament rupture (capsules)	€500.00	Special for puppies (distemper, parvovirus)	€13.00
Trochleoplasty (patellar luxation)	€335.00	Leptospirosis	€20.00

**10% discount on grooming services, training and residences**

#### PRICE NOTES

**nc:** procedures with no charge for the insured party.

\*Anaesthesia included in animals up to 40 kg.

#### GENERAL INFORMATION

**1. All emergencies must be coordinated by using the emergency number indicated on [www.segurcaixaadeslas.es](http://www.segurcaixaadeslas.es)**

A "life-threatening emergency" is an unexpected and serious medical situation that affects a pet and requires immediate veterinary attention. This situation must be resolved immediately and cannot wait to be treated during a veterinary consultation by appointment because that critically endangers the animal's life.

**2.** All services carried out that stem from emergencies will be liable to a **25% surcharge** on the basic rate.

**3.** With regard to treatment prices, serums, medicines, prostheses and orthoses **are not included**, nor are pins, meshes, plates, cerclage or the resuscitation of newborns, where necessary.

**4.** In communities where vaccination is compulsory, the costs of the paperwork will be charged at the private cost set by the veterinary clinic the insured party has used.

**5.** There is a possibility that not all the procedures related to the price are performed in all the clinics within the network. Check availability.

**6.** The "specialist consultation" only applies to those families specified in the price.

**7.** Daytime hospital admissions depend on the opening hours of each centre.

**8.** For all other procedures not included in this schedule, the private rate of the veterinary clinic shall apply.
